20 E	You are given an array A of N integers. An equilibrium position is a position where the sum of all integers on its left is equal to the sum of all integers on its right in the array A. Print the index of the equilibrium position.	3C5063?
BRAGGES	Note: For any given array there is only a single equilibrium position, if no equilibrium position is found then print "NOT FOUND" without	
BR	The array is 1 indexed.	S63 BERY
o.		20
305063?	Input Format:	css
7	The input consists of two lines:	5BR13C55
BRI	The first line contains an integer denoting N.	
763 3BRN	The second line contains N space-separated integers denoting the elements of the array A.	3050633.
	Input will be read from the STDIN by the candidate	300
SHRIZES	Output Format:	an t
BK	Print the index of the equilibrium position. If no index is found, print "NOT FOUND" Sample Input	38R21
