BRIBCSS	3BR23CS063	0
BRY	XPERIMENT Set	BR
E	ANT ON RAIL Description There is a cont on your belong the worter to leave the roll on competiment it moves left until it gets.	
Ti	itle	0
Ti	ANT ON RAIL	305
22	Description 35th Sold States Sold States Sold Sold Sold Sold Sold Sold Sold Sold	
(03 3V	Description There is a ant on your balcony. It wants to leave the rail so sometimes it moves right and sometimes it moves left until it gets exhausted Given an integer array A of size N which consists of integer 1 and -1 only representing ant's moves.	.063?
5	exhausted. Given an integer array A of size N which consists of integer 1 and -1 only representing ant's moves.	5
cs.	Where 1 means ant moved unit distance towards the right side and -1 means it moved unit distance towards the left .Your task	
BRIBCSS	is to find and return the integer value representing how many times the ant reaches back to original starting position.	aRZ
5~	Note:	3820
0	Assume 1-based indexing	
305063	Assume that the railing extends infinitely on the either sides	es
3	Input Format:	13°5°
0	Figure 1. An integer value N representing the number of moves made by the ent	
163 3BP2	input1 : An integer value N representing the number of moves made by the ant.	ó
26,3	input2 : An integer array A consisting of the ant's moves towards either side	0639
	Sample Input
