	You are competing in a basketball contest. In this contest the score for each successful shot depends on both the distance from the basket and the player's position. The ball is shot N times, successfully. You are given an array A containing the distance of a player from basket for N shots. The index of array represents the position of the player. Score is calculated by multiplying the position with the distance from the basket	,c5063
&RLI3CSS	contiguous subarray of size K from the given array.	633BR2
305063	Note:	
30505	* A subarray is a contiguous part of array.	3R23C5C
	* Assume 1 based indexing.	3P.
3BR)	* The array contains both negative and positive values.	o.
63	* Assume the player is standing on a cartesian plane.	5000032
